System Name: Manufacturing Ops Smart Factory - ABL **Alias:** Smart Factory Rx - ABL; SFRx - ABL **APP ID:** BA0001711	**Document Type:** QA-Val Environment Software Installation Qualification (SIQ)
System Version Number: 1.3	**Document Version Number:** 2.0 **Page ID:** 707970517

Revision History

Document Version	Document Version Date	Written by (Name and Function)	Summary
1.0	07 Jan 2026	Ernesto A Sanchez - Infrastructure Resource	Initial Version
2.0	08 Jan 2026	Ernesto A Sanchez - Infrastructure Resource	Executed Version

Purpose

The purpose of this document is to detail the steps required to migrate all required content for the ABL - Risa Release 3 (Upstream Equipment and Mobile Alerts) from the Development environment to the QA/Validation environment.

Prerequisites

- SFRx ABL QA/Validation instance is in version 2.2.1 or above.
- Strategies have been validated by an SFRx Technical Support contact.

System Configuration Variables

Configuration Variable	Value
Site	*ABL*
Environment	*QA/Validation*
Environment Server	*WA01929Q*
Environment URL	*https://smart-factory-abl-q.k8s.abbvienet.com/*
Lower Env	*Development*
Lower Env Server	*WA02836D*
Lower Env URL	*https://smart-factory-abl-d.k8s-d.abbvienet.com/*
Migration Folder	*E:\Applied Materials\SmartFactoryRx_ABL\Migration\ABL_Risa-R3-Upstream_DevtoQA_{YYYYMMDD}*
Release Name	*ABL_Risa-R3-Upstream_DevtoQA_{YYYYMMDD}*
Equipment	*RT-0175-001* *RT-0177-001* *RT-0179-001* *RT-0181-001* *RT-0183-001*

	RT-0185-001 *RT-0187-001* *RT-0189-001* *RT-0191-001* *RT-0193-001* *RT-0195-001* *RT-0197-001* *RT-0199-001* *RX-0201* *RX-0203* *RX-0205* *RX-0207* *RX-0217* *RX-0219* *RX-0221* *RX-0223*
This concludes the definition of the configuration variables.	

Rollback Plan

Rollback Execution Steps	
Item	**Details**
Environment	QA/Validation
Objective	Rollback the SFRx instance to its pre-SIQ state (prior to the migration of data and SFRx/E3 configurations/enhancements).
Setup Steps	Using a Remote Desktop software, log onto the server being rolled back as an administrator.
Pre-Requisite	• *Executor should have administrative privileges on the server where the rollback is occurring.* • *The server being rolled back should be running and available from the AbbVie network.*

Rollback Execution Steps			
ID	**Description/Action**	**Pass/Fail**	**Migrator Name**
1	For each E3 Object that was migrated (with the name that was defined in this SIQ), go to version history, restore the previous version, and delete the migrated version.	N/A	N/A
2	Revert all the SFRx CLI objects, including any guardbands, with their previous versions.	N/A	N/A
3	Restore the new SFRx folders with the backup versions and rerun the Domain Settings commands.	N/A	N/A
4	Restart the ***<Site>*** SmartFactory Rx services by executing the instance-specific file at E:\Applied Materials\SFRxServiceRestarts.	N/A	N/A
This concludes the execution of this rollback.			

Installation/Configuration Steps

Installation Execution Steps	
Item	**Details**
Environment	QA/Validation
Objective	Migrate all the content for the SFRx ***<Site>*** instance from the ***<Lower Env>*** environment to the ***<Environment>*** environment.

Setup Steps	Retrieve the list of objects to export from E3 and place it in the ***<Migration Folder>*** directory.
Pre-Requisite	• *Executor should have administrative privileges on the server where the migration is occurring.* • *The server should be running and available from the AbbVie network.*

Installation Execution Steps

ID	Description/Action	Actual Results	Pass/Fail	Migrator Name
1	See Verification Step 1.	N/A	N/A	N/A
2	Log into the ***<Lower Env Server>*** via an RDP client software.	Completed Successfully	Pass	Ernesto A Sanchez
3	**SFRx Migration Package – E3 Export** 1. Open the E3 (EES) Launcher. 2. Log in using an account with administrative privileges. 3. On the “Administration” tab, select the “Import/Export” option. 4. Select the E3 Objects outlined in the E3Objects.xlsx file located in ***<Migration Folder>***. 5. Click on the “Export” button at the top of the screen, name the file ***<Release Name>***.e3pkg, and save the export package to the ***<Migration Folder>*** directory.	Completed Successfully	Pass	Ernesto A Sanchez
4	**Portal Objects Migration – CLI Export** 1. Navigate to E:\Applied Materials\SmartFactoryRx_***<Site>***\CLI\bin and open a CMD window. 2. Run the *sfrxcli -i --env* ***<Site>*** command. 3. Export the required migration files using the following commands: a. ee -f “***<Migration Folder>******<Release Name>***-***<Equipment>***.json” -e ***<Equipment>*** b. es -f “***<Migration Folder>******<Release Name>***-***<Equipment>***.csv” -e ***<Equipment>***	Completed Successfully	Pass	Ernesto A Sanchez
5	**Folders Migration – Directory Export** 1. Open the Objects/Dependency .xlsx file located in ***<Migration Folder>***. 2. Copy the SFRx Objects outlined in the file to the ***<Migration Folder>*** directory.	Completed Successfully	Pass	Ernesto A Sanchez
6	Log into the ***<Environment Server>*** via an RDP client software.	Completed Successfully	Pass	Ernesto A Sanchez
7	Copy the exported files from ***<Lower Env Server>*** to the same directory on ***<Environment Server>***.	Completed Successfully	Pass	Ernesto A Sanchez
8	**Folders Migration – Directory Import** 1. Open the Objects/Dependency .xlsx file located in ***<Migration Folder>.*** 2. Rename the existing SFRx Objects outlined in the file by adding a "_BKP-{YYYYMMDD}" at the end of the name. 3. Copy the SFRx Objects from the ***<Migration Folder>*** directory to the locations mentioned in the file.	Completed Successfully	Pass	Ernesto A Sanchez
9	**E3 Object Migration – E3 Import** 1. Open the E3 (EES) Launcher. 2. Log in using an account with administrative privileges. 3. On the “Administration” tab, select the “Import/Export” option. 4. Click the “Import” button and open the .e3pkg file located in ***<Migration Folder>***. 5. Click on the “Check Mapping” button at the bottom of the screen. 6. Once the mapping of all the objects has been verified, click the “Import” button. 7. Take a screen capture of the results.	Completed Successfully	Pass	Ernesto A Sanchez

10	See Verification Step 2.	N/A	N/A	N/A
11	Restart the following services using the Windows Services console: 1. SFRx_***<Site>***_E3Client 2. SFRx_***<Site>***_Portal	Completed Successfully	Pass	Ernesto A Sanchez
12	**Portal Objects Migration – CLI Import** 1. Navigate to E:\Applied Materials\SmartFactoryRx_***<Site>***\CLI\bin and open a CMD window. 2. Run the *sfrxcli -i --env* ***<Site>*** command. 3. Import the required migration files using the following commands: a. ie -if "***<Migration Folder>******<Release Name>***-***<Equipment>***.json" --comment "***<Release Name>***" b. is -if "***<Migration Folder>******<Release Name>***-***<Equipment>***.csv" --comment "***<Release Name>***" 4. Take a screen capture of the results.	Completed Successfully	Pass	Ernesto A Sanchez
13	See Verification Step 3.	N/A	N/A	N/A
14	**Portal Dashboard Migration – CLI Import** 1. Navigate to E:\Applied Materials\SmartFactoryRx_***<Site>***\CLI\bin and open a CMD window. 2. Run the *sfrxcli -i --env* ***<Site>*** command. 3. Import the required migration files using the following commands: a. ds --import --setting-type ProcessMap --static-file-directory "E:\Applied Materials\SmartFactoryRx_***<Site>***\Portal\data\static" b. ds --import --setting-type EquipmentHealth --static-file-directory "E:\Applied Materials\SmartFactoryRx_***<Site>***\Portal\data\static" c. ds --import --setting-type EquipmentView --static-file-directory "E:\Applied Materials\SmartFactoryRx_***<Site>***\Portal\data\static" d. ds --import --setting-type Operation --static-file-directory "E:\Applied Materials\SmartFactoryRx_***<Site>***\Portal\data\static" 4. Take a screen capture of the results.	**Not needed for release. Step has been skipped.**	N/A	N/A
15	See Verification Step 4.	N/A	N/A	N/A
16	Restart the **<Site>** SmartFactory Rx services by executing the instance-specific file at E:\Applied Materials\SFRxServiceRestarts.	Completed Successfully	Pass	Ernesto A Sanchez
17	Handover to project team for regular operations.	N/A	N/A	N/A
This concludes the installation execution steps.				

Verification Steps

Verification Steps	
Item	**Details**
Environment	QA/Validation
Objective	Verify the success of the data migration by performing the tasks below.
Setup Steps	Complete all steps in the Installation Execution section of this SIQ.
Pre-Requisite	• *Executor should have administrative privileges on the server where the verification is occurring.* • *The server should be running and available from the AbbVie network.*
Verification Steps	

ID	**Description/Action**	**Actual Results**	**Pass/ Fail**	**Executor**

1	Provide evidence of the Strategy validation/approval included in the Release Migration via an email screen capture.	 RE: ABL Development Check In Spear, Trevor To Sanchez, Ernesto A; Upendra Kumar, Yashila Cc Yu, Vicky; Puchalapalli, Srilatha; House, Elizabeth; Srilatha_Puchalapalli@amat.com; Rosado, Francisco J; Tait, Ashley; Bell, Allen W; Pothapu, Tamrika Reddy Thu 1/8/2026 12:54 PM Retention Policy 1 Month Retention - Inbox (30 days) Expires 2/7/2026 This item will expire in 30 days. To keep this item longer apply a different Retention Policy. Start your reply all with: Will do, thank you. Will do, thanks! Thank you! Feedback Hi Ernesto, Everything is completed. Please proceed to migrate ABL from Dev to QA. Best Regards, Trevor Spear Trevor Spear OBI Data Science Team abbvie **Remote Office: Vancouver, WA** **CELL:** (503)867-6114 **EMAIL:** trevor.spear@abbvie.com	Pass	Ernesto A Sanchez
2	Provide a screenshot of the E3 Import/Export module with the E3 Objects Package import results.		Pass	Ernesto A Sanchez
3	Provide a screenshot of the CMD window with the SFRx Portal imports (equipment and script) using the CLI and their results.	Equipment:  	Pass	Ernesto A Sanchez

		 Scripts (RB):    Run Boundaries for equipment RT-0179-001, RT-0181-001, RT-0183-001 and RT-0185-001 were added manually		
4	Provide a screenshot of the CMD window with the SFRx Domain Setting imports using the CLI and their results.	**Not needed for release. Step has been skipped.**	N/A	N/A
This concludes the verification steps.
